Status of Claims

1. This is in response to the amendment filed on January 21, 2009. Claims 1-6, 8-25, 29 and 40-75 without prejudice or disclaimer. In place of the canceled claims, applicants submit new claims 76-91, which include new independent claims 76, 86 and 88. Claims 76-91 have been allowed.

Reasons for Allowance

2. The application is regarding the method of providing and displaying pre-recorded data in a limiting area of an optical disk. In this case, the data being displayed is advertisement. After the display, the limiting area is cancelled, enabling new data to be recorded over the area. The closest prior references are by Ueki (U.S 6, 678,236). Ueki teaches an invention in which the lead in area of the disk is being made a recording-limited area by error correction process on a signal read out from a recording disc, for example, a DVD-Video or a DVD-RW. In this case, the signal or data being read is copy protection data (column 10, lines 33-36, lines 44-54). However, Ueki, does not teach a method of recording information and a recording medium in which the recording medium includes a user data area in which user data can be erased or recorded, and a management area in which management information is recorded. The recording-limited area of independent claims 76, 86 and 88 is further set forth as being an area in which recording is physically possible but is logically limited. See page 4, lines 1-6 of the specification describing the recording-limited area: The recording-limited area can be created by making it

impossible to read the allocation information for the limited area. This limit can be canceled by recording the allocation information for the limited area on the recording medium. Since a recording cannot be performed without the allocation information for the recording limited area, the recording medium cannot be recorded at this stage. According to claims 76 and 88, the recording limit is canceled by playing back or reading predetermined information that is pre-recorded in the recording-limited area. The canceling of the recording limit, according to an exemplary embodiment of the present invention, is understood first from the explanation of the manner in which the recording limit is set.

Conclusion

4. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
